

Vertical Cable Management for Relay Racks

Vertical Distribution Managers are available in 8" and 12" widths. The VDM offers quick and easy cable routing for high density cable installation. Optional dual front doors offer easy access to cables and provide an elegant look for your data center. Cable fingers and spools support cables as they move from patch panels and eliminate the need for horizontal cable managers.

Fiber can be routed in a separate fiber retainer and may be purchased separately (see below).

VDM units fit standard DLC racks.
For 77" racks:

P/N 8"	VDM-77-8
P/N 12"	VDM-77-12

VDM units come with mounting hardware and four cable spools.

Door Part # for VDM Cable Manager
For 77" Racks:

P/N FOR 8"	VDM-77-8DR
P/N FOR 12"	VDM-77-12DR
