

Cable Shelves

Cable shelves store excessive cabling within the cabinet and work in conjunction with the deflector panel, directing the airflow backward and upward.

CO2 Cooling from DL Custom and TROX AITCS:

DL Customs is proud to offer fully integrated cooling solutions with TROX AITCS CO2 technology. Our solutions offer customized server enclosures with rear door mounted units for high density applications.

Features:

- Eliminates water from the data center – CO2 is electrically benign
- CO2 is a non-flammable, non-toxic natural refrigerant with a Global Warming Potential of 1 (R-134a has a GWP of 1300)
- Dual power supplies
- EC fans with power factor correction
- High density server racks reduce floor areas by up to 75%
- Energy-efficient, with up to 30% savings in comparison with chilled water (CHW) systems
- Maximum safety due to a gas detection and isolation system
- Ideal for new or existing data centers

Options:

- Wide range of pipe work and coil arrangements
- Plant options: chilled water cooled, condenser water cooled or air cooled
- System capacities ranging from 40 kW to 1 MW and higher
- The CO2OLflow™ system further reduces your energy consumption by eliminating the need for pumps
