

Patch panels can now be mounted at the rear of the cabinet, there-by eliminating use of the front rack mount section in the cabinet.

Dual split doors open to crimp cable to connectors. Various options and cut-outs are available. Tie wrap loops are installed in order to keep all cables organized.

Unlimited cable solutions are provided by DLC. Give us a call and we can provide an answer to your cable management problems.

## DLCGS External Cable Manager

The External Cable Manager is a great add-on for your existing cabinets that need cable management or for a new addition. It mounts to the exterior of the cabinet and allows fluid movement from front to back and top to bottom. It comes in a variety of sizes and features top and bottom cable entry and split or full front and rear doors.

This unit is available for a variety of cabinets. Consult with your dealer for details.
